Here is a link to a very low resolution copy for your perusal. The graphics will be much cleaner with the final version.

[https://usepa.sharepoint.com/sites/R7\\_Work/OPA/Shared%20Documents/Multimedia%20Dev/140528%20WLU%20Next%20Steps%20Infographic-DRAFT.pdf](https://usepa.sharepoint.com/sites/R7_Work/OPA/Shared%20Documents/Multimedia%20Dev/140528%20WLU%20Next%20Steps%20Infographic-DRAFT.pdf)

I've edited a bit of the copy as well. Please let me know next steps, thanks!

# West Lake Update

## ***The Path Ahead***

May 2014

This special edition of the West Lake Update illustrates the next steps along the path of progress toward selection of a final remedy for the site. Our goal remains constant along the way – to protect human health and the environment using sound science as the basis for our decisions.

### ***Draft a Pre-Construction Work Plan***

The draft work plan is being reviewed by EPA in coordination with our Office of Research and Development and the US Army Corps of Engineers. Upon approval of the work plan, preconstruction activities will commence.

### ***BMAC Screening***

EPA has completed the field screening. Results will be compiled into a report which will be posted on EPA's website. Lab data from the soil sampling will be available in 30-60 days.

### ***CAG Meeting***

The next CAG meeting is planned for May 29, 2014.

### ***Start of Pre-Construction Activities***

Field work associated with the preconstruction phase will begin shortly following approval of the work plan. These activities include clearing of surface vegetation and installation of litter control equipment, as well as planning for onsite air monitoring.

### ***Second Interagency Agreement with USACE***

EPA is developing a second agreement with the US Army Corps of Engineers to enlist their expertise for the remedy selection process. The signed agreement will be posted on EPA's webpage.

## ***Next Steps***

Additional upcoming milestones include: Administrative Order for the design and construction of the isolation barrier, barrier design documents and construction work plans, isolation barrier construction, USGS groundwater data review, Second Supplemental Feasibility Study.
